

# The Grand-Chemin spirit, from vineyard to wine glass...

As independent winegrowers, Jean-Marc and Emmanuel Floutier show respect for the integrity of their vineyard resources.

**The vineyard is certified Level 3 High Environmental Value and ISO 14001 since 2012.**

**Planet' Emeraude** is a trademark registered by Grand-Chemin and perfectly epitomises our values and commitments.

## The soils

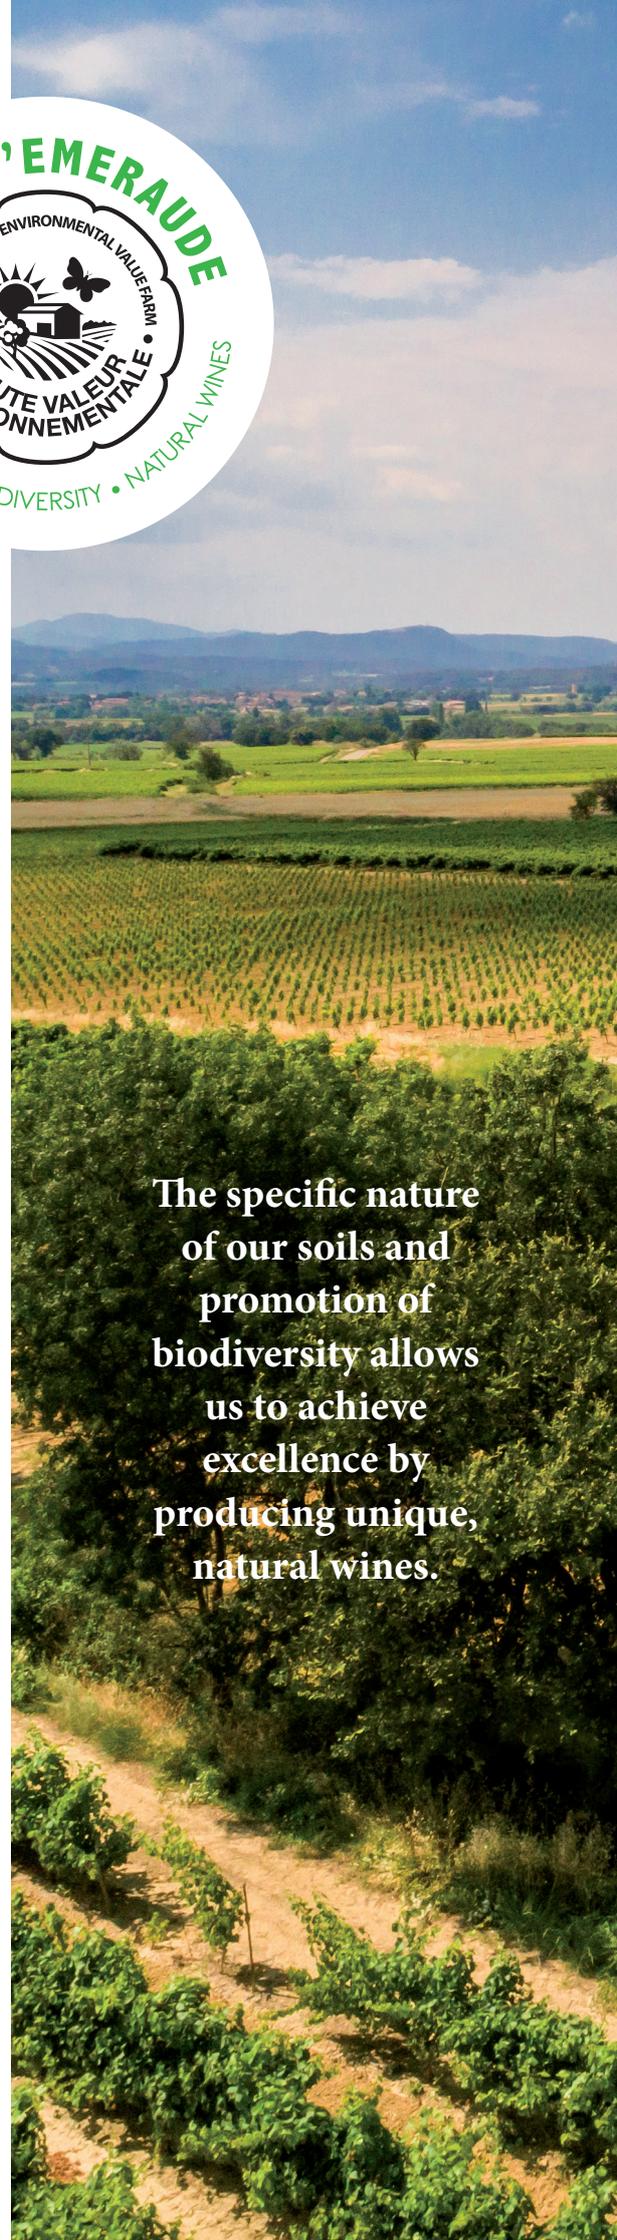

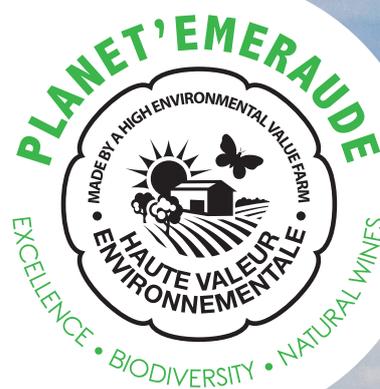

- > Grand-Chemin has 70 hectares under vine in the **complex and unique region of the Cevennes foothills.**
- > Our wines are grown in **Designated Vineyard Sites** (Le Faillet, Les Combes...) where the soils dictate the range of varieties we plant depending on their unique features.
- > Our **microclimate**, with significant diurnal shift, produces **highly elegant, fresh, aromatic wines** with moderate alcohol content.

## The vineyards

- > Tillage is engrained in our culture and prioritises wildlife in order to **enhance and preserve biodiversity.**
- > We use **biotech methods** by placing pheromone distributors in our vineyards aimed at preventing insects from mating. This helps reduce the use of plant protection products.

## Winemaking

- > In a bid to maintain the intrinsic qualities of our fruit, we use pre-fermentation maceration **with no added SO2.**
- > The production process for Grand-Chemin wines involves controlling temperatures in order to **preserve the inherent nature of the fruit.**
- > Every year, an **independent authorised laboratory** analyses our wines for residues. Our objective is zero residue.

**The specific nature of our soils and promotion of biodiversity allows us to achieve excellence by producing unique, natural wines.**

DOMAINE  
GRAND-CHEMIN

# Wines from our vineyards

## > So much more than just wine:

- A benchmark: long on the palate, fresh with a natural flavour.
- The wines are monitored and analysed
- Certified ISO 14001 in 2012 (environmental standard), updated in 2020.
- HVE-certified in 2019

## > Proactive in our vineyards and our winery

## Customised protection

### HYGIENE AND STORAGE

> Water and steam cleaning

> Limited use of winemaking additives (yeast)

> Low sulphite usage: ½ amount of organic

### PLANT HEALTH

> No copper treatments

> Mating disruption

> Part biological control

## > An ambition shared by all the estate's staff

OUR SLOGAN:  
**GOOD QUALITY, ETHICAL WINES**
